

⚠ Please make sure that you definitely read this before assembly of the product.

- Please check all the parts and fix them together correctly according to the Instructions for Assembly and Use.
- Make sure there is enough space to assemble the unit. Please be careful to protect the floor or any furniture from damage by putting down a rug or similar covering.
- Make sure that definitely at least two people assemble this product.
- Please use a screwdriver that matches the shape of the screws. There is the danger that the screws make break if a screwdriver that is not suitable for the shape of the screws is used.
- When fixing the screws into the product, a smooth finish is achieved by screwing them in a little tightly but please be careful as problems such as the panels cracking or the screws getting deeply stuck may occur if the screws are fixed too tightly.
- When setting the back panels in place, please provisionally fit the wooden screws and tighten them properly after checking that the panels are fitted in the grooves. If they are not inserted properly in the grooves the back panels may collapse.

The illustrations for the Instructions for Assembly and Use are for the 5 tier pulp-board storage box. The assembly procedure for the 2, 3 and 4 tier products is the same.

1 Fit one side panel ①, the top board and base board ② together with the wooden screws ⑤.
※ Please check that the grooves in the side panel ① and those in the top and base board ② fit together properly before tightening the wooden screws ⑤.

2 Fix the middle shelves ③ to the side panel ①.
※ The same as in ① please make sure that the positioning of the grooves for the side panel and middle shelves properly align.

Align the positioning of the grooves.

Align the positioning of the grooves.

3 Gently turn the product assembled in steps ① and ② upright and insert the back panels ④ after aligning them with the grooves in the top board, base board and middle shelves.

※ Please check that all of the back panels are inserted in the groove in the side panel.

4 Fix the other side panel ① with the wooden screws ⑤.

※ For this procedure, do not completely tighten the screws; fasten them leaving the heads of the screws protruding a little. After adjusting the product until all of the back panels are inserted into the groove in the side panel, as shown in illustration 1, and checking that all of the back panels are inserted into the groove in the side panel, tightly fasten the screws.

④ Adjust the product until the back panels are inserted into the groove in the side panel.
